ROTENBERG, M., Effect of Certain Stochastic Parameters on Extinction and Harvested Populations 455

FISHMAN, S., EREZ, A. and COUVILLON, G. A., The Temperature Dependence of Dormancy Breaking in Plants: Mathematical Analysis of a Two-Step Model Involving a Cooperative Transition 473

DI GIULIO, M. and CALDARARO, F., Absorbent Markov Chains as a Model for the Study of the Evolution of Proteins 485

HSU, J.-P., Stochastic Modeling of Bacterial Adhesion: A Two-step Mechanism with Linear Adhesion Rate 495

Index to Volume 124

Activation waves; cortical activity in vertebrate eggs, 377
Adhesion, bacterial, kinetics of; a stochastic analysis, 405
Adhesion, bacterial, stochastic modeling; a two-step mechanism with linear adhesion rate, 495
Age classes, niche differences between, and intraspecific competition in age-structured populations, 25
ALBERY, W. J. and KNOWLES, J. R., Energetics of enzyme catalysis. I. Isotopic experiments, enzyme interconversion, and oversaturation, 137
ALBERY, M. J. and KNOWLES, J. R., Energetics of enzyme catalysis. II. Oversaturation, case diagrams, reversible and irreversible behaviour, 173
ALEXANDER, R. MCN., Bending of cylindrical animals with helical fibres in their skin or cuticle, 97
ALFF-STEINBERGER, C., Codon usage in *Homo sapiens*: evidence for a coding pattern on the non-coding strand and evolutionary implications of dinucleotide discrimination, 89
Animals, cylindrical, with helical fibres in their skin or cuticle, bending of, 97
Autosomal and cytoplasmic sex ratio factors, coevolution of, 317

Bacterial adhesion kinetics, a stochastic analysis, 405
Bacterial adhesion, stochastic modeling; a two-step mechanism with linear adhesion rate, 495
Bending of cylindrical animals with helical fibres in their skin or cuticle, 97
Binding, ligand, to transiently accessible sites: mechanisms for varying apparent binding rates, 335
Biochemical system, multiply regulated, analysis of bursting in; from a simple to complex oscillatory behaviour, 219
Biologists, how the slot machine led them astray, 127
Birds, parent, feeding dependent young, optimal foraging by, 251
Bursting in a multiply regulated biochemical system, analysis of; from a simple to complex oscillatory behaviour, 219

CALDARARO, F. (see DI GIULIO, M.), 485
CARDENAS, L. (see CORNISH-BOWDEN, A.), 1
Catalysis, enzyme, energetics of; isotopic experiments, enzyme interconversion, and oversaturation, 137
Catalysis, enzyme, energetics of; oversaturation, case diagrams, reversible and irreversible behaviour, 173
Channels, relationship between statistical properties of single ionic channel recordings and the thermodynamic state of, 71
CHEER, A., VINCENT, J.-P., NUCCITELLI, R. and OSTER, G., Cortical activity in vertebrate eggs I: the activation waves, 377
Chromosome inversion data, computational complexity of inferring phylogenies from, 213
Codon usage in *Homo sapiens*: evidence for a coding pattern on the non-coding strand and evolutionary implications of dinucleotide discrimination, 89
Codon usage, preferential, translocation rate modification by; intragenic position effects, 43
Coevolution of autosomal and cytoplasmic sex ratio factors, 317
Competition, intraspecific, in age-structured populations, and niche differences between age classes, 25
Complexity, computational, of inferring phylogenies from chromosome inversion data, 213
Complexity and order, notes on, 111

Cooperative transition in two-step model for temperature dependence of dormancy breaking in plants, 473
Co-operativity in monomeric enzymes, 1
CORNISH-BOWDEN, A. and CARDENAS, L., Co-operativity in monomeric enzymes, 1
Cortical activity in vertebrate eggs: the activation waves, 377
COUVILLON, G. A. (see FISHMAN, S.), 473
CSÁNYI, V. (see KAMPIS, G.), 111
Cuticle, bending of cylindrical animals with helical fibres in, 97
Cytoplasmic and autosomal sex ratio factors, coevolution of, 317

DAY, W. H. E. and SANKOFF, D., Computational complexity of inferring phylogenies from chromosome inversion data, 213
DE BOER, R. J. and HOGEWEG, P., Immunological discrimination between self and non-self by precursor depletion and memory accumulation, 343
DECROLY, O. and GOLDBETER, A., From a simple to complex oscillatory behaviour: analysis of bursting in a multiply regulated biochemical system, 219
Digesta flow, the case for stochastic models of (letter), 371
DI GIULIO, M. and CALDARARO, F., Absorbent Markov chains as a model for the study of the evolution of proteins, 485
Dinucleotide discrimination, evolutionary implications of; codon usage in *Homo sapiens*, 89
D-loop region common to five vertebrate mitochondrial DNAs, sequence deduced physical properties in, 57
DNAs, mitochondrial, vertebrate, five, sequence deduced physical properties in the D-loop region common to, 57
Dormancy breaking in plants, the temperature dependence of; mathematical analysis of a two-step model involving a cooperative transition, 473
DUNON-BLUTEAU, D. (see MIGNOTTE, B.), 57

EBENMAN, B., Niche differences between age classes and intraspecific competition in age-structured populations, 25
Eggs, vertebrate, cortical activity in; the activation waves, 377
Energetics of enzyme catalysis. Isotropic experiments, enzyme interconversion, and oversaturation, 137
Energetics of enzyme catalysis. Oversaturation, case diagrams, reversible and irreversible behaviour, 173
Enzyme catalysis energetics. Isotopic experiments, enzyme interconversion, and oversaturation, 137
Enzyme catalysis energetics. Oversaturation, case diagrams, reversible and irreversible behaviour, 173
Enzymes, monomeric, co-operativity in, 1
EREZ, A. (see FISHMAN, S.), 473
Evolution for accumulating genetic information, a model, 199
Evolution of proteins, absorbent Markov chains as a model for the study of, 485
Evolutionary implications of dinucleotide discrimination; codon usage in *Homo sapiens*, 89
Extinction and harvested populations, effect of certain stochastic parameters on, 455

Feeding of dependent young by parent birds, optimal foraging for, 251
Feeding, vigilance while, and its relation to the risk of predation, 303
Fibres, helical, in skin or cuticle, bending of cylindrical animals with, 97
FISHMAN, S., EREZ, A. and COUVILLON, G. A., The temperature dependence of dormancy breaking in plants: mathematical analysis of a two-step model involving a cooperative transition, 473
Foraging, optimal, by parent birds feeding dependent young, 251
Functionally equivalent residues at given sites in proteins, on the prediction of (letter), 123

Genetic information, accumulating, a model of evolution for, 199
GOLDBETER, A. (see DECROLY, O.), 219
GRANT, A. O. (see STARMER, C. F.), 335

Harvested populations, effect of certain stochastic parameters on extinction and, 455
HOGEWEG, P. (see DE BOER, R. J.), 343
Homo sapiens, codon usage in; evidence for a coding pattern on the non-coding strand and evolutionary implications of dinucleotide discrimination, 89
HOUSTON, A. I., Optimal foraging by parent birds feeding dependent young, 251
HSU, J.-P., Stochastic modelling of bacterial adhesion: a two-step mechanism with linear adhesion rate, 495
HSU, J.-P. and WANG, H.-H., Kinetics of bacterial adhesion—a stochastic analysis, 405

Immunological discrimination between self and non-self by precursor depletion and memory accumulation, 343
Information, genetic, accumulating, a model of evolution for, 199
Intragenic position effects; translation rate modification by preferential codon usage, 43
Ionic channel recordings, relationship between statistical properties of, and the thermodynamic state of the channels, 71
Ionizable groups, potential and pH distribution across a membrane with a surface layer of, 191

JU, M. (see WANG, Z.-X.), 293

KAMPIS, C. and CSÁNYI, V., Notes on order and complexity, 111
Kinetics of bacterial adhesion—a stochastic analysis, 405
KNOWLES, J. R. (see ALBERY, W. J.), 137, 173
KONDO, T. (see OHSHIMA, H.), 191

LASIČ, D. D., A general model of vesicle formation, 35
Ligand binding to transiently accessible sites: mechanisms for varying apparent binding rates, 335
LILJENSTRÖM, H. and VON HEIJNE, G., Translation rate modification by preferential codon usage: intragenic position effects, 43
LIMA, S. L., Vigilance while feeding and its relation to the risk of predation, 303
Limb production, supernumeracy, in salamanders, a non-linear vector field model, 415

Markov chains, absorbent, as a model for the study of the evolution of proteins, 485
MATIS, J. H., The case for stochastic models of digesta flow (letter), 371
Membrane with a surface layer of ionizable groups, potential and pH distribution across, 191
Memory accumulation, immunological discrimination between self and non-self by precursor depletion and, 343
MIGNOTTE, B., DUNON-BLUTEAU, D., REISS, C. and MOUNOLOU, J.-C., Sequence deduced physical properties in the D-loop region common to five vertebrate mitochondrial DNAs, 57
Mitochondrial DNAs, vertebrate, five, sequence deduced physical properties in the D-loop region common to, 57
Model of vesicle formation, 35
Monomeric enzymes, co-operativity in, 1
MOUNOLOU, J.-C. (see MIGNOTTE, B.), 57

Niche differences between age classes and intraspecific competition in age-structured populations, 25
NUCCITELLI, R. (see CHEER, A.), 377

OHSHIMA, H. and KONDO, T., Potential and pH distribution across a membrane with a surface layer of ionizable groups, 191
OHTA, T., A model of evolution for accumulating genetic information, 199
OPADIA-KADIMA, G. Z., How the slot machine led biologists astray, 127
Order and complexity, notes on, 111
Oscillatory behaviour, from simple to complex; analysis of bursting in a multiply regulated biochemical system, 219
OSTER, G. (see CHEER, A.), 377

PACKER, D. L. (see STARMER, C. F.), 335
Parent birds feeding dependent young, optimal foraging by, 251
Peptidoglycan in *Staphylococci*, a model for the three-dimensional structure, 275
pH distribution across a membrane with a surface layer of ionizable groups, 191
Phylogenies inferred from chromosome inversion data; computational complexity, 213
PINCUS, M. R. (see SELIGMAN, S. J.), 275
Plants, temperature dependence of dormancy breaking in; mathematical analysis of a two-step model involving a cooperative transition, 473
Populations, age-structured, niche differences between age classes and intraspecific competition in, 25
Populations, harvested, effect of certain stochastic parameters on extinction and, 455
Potential and pH distribution across a membrane with a surface layer of ionizable groups, 191
Precursor depletion and memory accumulation, immunological discrimination between self and non-self by, 343
Predation risk, and relation to vigilance while feeding, 303
Proteins, absorbent Markov chains as a model for studying the evolution of, 485
Proteins, multi-peptide chain, number of ways of joining SH groups to form, 293
Proteins, on the prediction of functionally equivalent residues at given sites in (letter), 123

Regulated biochemical systems, analysis of bursting in; from a simple to complex oscillatory behaviour, 219
REISS, C. (see MIGNOTTE, B.), 57
Residues, functionally equivalent, at given sites in proteins, on the prediction of (letter), 123
Risk of predation, relation to vigilance while feeding, 303
ROTENBERG, M., Effect of certain stochastic parameters on extinction and harvested populations, 455

Salamanders, a non-linear vector field model of supernumerary limb production in, 415
SANKOFF, D. (see DAY, W. H. E.), 213
Self and non-self, immunological discrimination between, by precursor depletion and memory accumulation, 343
SELIGMAN, S. J. and PINCUS, M. R., A model for the three-dimensional structure of peptidoglycan in *Staphylococci*, 275
Sequence deduced physical properties in the D-loop region common to five vertebrate mitochondrial DNAs, 57
Sex ratio factors, autosomal and cytoplasmic, coevolution of, 317
SH groups, number of ways of joining to form multi-peptide chain proteins, 293
Skin, bending of cylindrical animals with helical fibres in, 97
Slot machine, how it led biologists astray, 127
Staphylococci, a model for the three-dimensional structure of peptidoglycan in, 275
STARMER, C. F., PACKER, D. L. and GRANT, A. O., Ligand binding to transiently accessible sites: mechanisms for varying apparent binding rates, 335
Statistical properties of single ionic channel recordings and the thermodynamic state of the channels, relationship between, 71

STEINBERG, I. Z., Relationship between statistical properties of single ionic channel recordings and the thermodynamic state of the channels, 71
Stochastic analysis of kinetics of bacterial adhesion, 405
Stochastic modelling of bacterial adhesion: a two-step mechanism with linear adhesion rate, 495
Stochastic models of digesta flow, the case for (letter), 371
Stochastic parameters, effect on extinction and harvested populations, 455
Structure, three-dimensional, of peptidoglycan in *Staphylococci*, a model for, 275
Supernumerary limb production in salamanders, a non-linear vector field model, 415

Temperature dependence of dormancy breaking in plants: mathematical analysis of a two-step model involving a cooperative transition, 473
Thermodynamic state of channels, relationship between statistical properties of single ionic channel recordings and, 71
TOTAFURNO, J. and TRAINOR, L. E. H., A non-linear vector field model of supernumerary limb production in salamanders, 415
TRAINOR, L. E. H. (see TOTAFURNO, J.), 415
Translation rate modification by preferential codon usages: intragenic position effects, 43
TSOU, C.-L. (see WANG, Z.-X.), 293

Vertebrate eggs, cortical activity in; the activation waves, 377
Vertebrate mitochondrial DNAs, five, sequence deduced physical properties in the D-loop region common to, 57
Vesicle formation, a general model, 35
Vigilance while feeding and its relation to the risk of predation, 303
